

Platform Terms of Service

One agreement for Pink Slip Arcade and every Game Mode

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

These Terms form a binding agreement between you and NyFTee Original LLC. Read them carefully. Section 20 contains an individual arbitration agreement and class-action waiver, subject to a 30-day opt-out and mandatory rights that cannot lawfully be waived.

1. Who We Are and What These Terms Cover

You do not need a new Terms of Service for each Game Mode. A Game Mode may publish concise gameplay rules, but those rules do not replace this platform-wide agreement.

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

The Platform is operated by NyFTee Original LLC, located at 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States. In these Terms, "Pink Slip Arcade," "PSA," "Company," "we," "us," and "our" refer to NyFTee Original LLC. "You" means the individual accepting these Terms.

These Terms apply whenever you visit, create an account, connect a wallet, play, purchase, mint, earn, claim, transfer, list, trade, communicate, compete, or otherwise use any part of the Platform. Mode-specific instructions, scoring systems, event cards, collection pages, and technical rules are incorporated only to supply operational details.

2. Acceptance and Contract Hierarchy

You accept these Terms by clicking an acceptance control, creating or using an account, connecting a wallet after being presented with these Terms, or using the Platform after an effective update. If you do not agree, do not use the Platform.

The following documents are incorporated into these Terms: the EULA; Privacy Policy; Cookie Policy; Web3, Digital Asset and Play-to-Earn Terms; NFT License; Competition and Rewards Rules; Community Standards and Fair Play Policy; Purchase and Refund Policy; and Copyright/DMCA Policy. If terms conflict, a signed written agreement controls first, then an Event Card solely for event-specific facts, then the specialized policy for its subject, then these Terms.

3. Eligibility and Geographic Availability

You must be at least 18 years old and legally capable of entering a contract. The Platform is not directed to minors, and minors may not create accounts or use any feature.

The Platform is intended to be reachable worldwide where lawful, but internet access or access to the Base network does not establish legal eligibility. You may use the Platform only where its features are lawful for you and where Company may lawfully provide them.

- You are not located in, ordinarily resident in, or acting from a jurisdiction subject to applicable comprehensive sanctions or a jurisdiction Company blocks for legal or risk reasons.
- You are not identified on an applicable sanctions, denied-person, or restricted-party list and are not owned or controlled by such a person.
- Your use does not violate export controls, financial-services rules, gaming or gambling laws, consumer law, tax law, or any other applicable law.
- Company may require identity, age, location, sanctions, tax, or eligibility verification before or after allowing access to particular features.

4. Accounts, Credentials, and Wallets

Provide accurate information, keep it current, and maintain only accounts you are authorized to control. You are responsible for activity under your credentials and connected wallets unless applicable law provides otherwise. Notify us promptly of suspected compromise.

Never share passwords, recovery codes, private keys, seed phrases, authentication codes, or remote-control access. Company will never ask for a seed phrase or private key. A blockchain address may be public and is not proof that a person is legally entitled to an account.

We may limit accounts, require reauthentication, delay a transaction, or temporarily restrict features to investigate fraud, security events, sanctions, payment disputes, cheating, or ownership.

5. Platform Access and Limited License

Subject to these Terms, Company grants you a personal, limited, non-exclusive, non-transferable, revocable license to access and use the Platform for lawful entertainment and permitted gameplay. The EULA supplies additional software-license conditions.

Company and its licensors retain all right, title, and interest in the Platform, game systems, software, audiovisual materials, characters, lore, brands, interfaces, databases, and other content, except for rights expressly granted in the NFT License or a separate written license.

6. Game Modes, Rules, Balance, and Availability

Game Modes may have different objectives, controls, scoring, progression, matchmaking, rewards, eligibility, equipment limits, and seasons. We may balance, patch, add, remove, suspend, reset, or retire gameplay features when reasonably necessary for security, fairness, law, technical integrity, or the health of the Platform economy.

Mode Rules and Event Cards may change operational details without creating a new platform contract. A material change that affects purchased rights, dispute terms, privacy, or legal obligations will be handled under the update provisions of the relevant policy and applicable law.

7. Virtual Items and Digital Assets

The Platform may include off-chain virtual items, on-chain digital assets, NFTs, tokens, rewards, licenses, consumables, access rights, and cosmetics. Legal ownership, intellectual-property rights, transferability, utility, redemption, and refund treatment differ by asset and are governed by the Web3 Terms, NFT License, Purchase and Refund Policy, and the applicable item disclosure.

Marketing expressions such as "own," "earn," or "play-to-earn" do not promise profit, appreciation, liquidity, continuous utility, or fiat redemption. No item gives equity, debt, voting rights in Company, dividends, revenue share, or a claim on Company assets unless a separate legally compliant written instrument expressly says so.

8. Purchases and Payments

Prices, taxes, fees, payment methods, delivery timing, and material restrictions will be displayed at or before purchase. You authorize Company and its payment providers to charge the selected method. You are responsible for legally imposed taxes and blockchain fees unless stated otherwise.

Digital purchases may be final once delivered, consumed, minted, claimed, or transmitted, subject to the Purchase and Refund Policy and non-waivable consumer rights. Do not initiate a chargeback for a valid purchase merely because you changed your mind or an asset's market value changed.

9. User Content and Feedback

You retain rights you hold in content you submit. You grant Company a worldwide, non-exclusive, royalty-free, sublicensable license to host, reproduce, adapt for technical display, distribute, and display that content only as needed to operate, secure, moderate, promote, and improve the Platform. For public posts, highlights, usernames, and gameplay clips, the license lasts while the content is available and for reasonable backups, legal records, and already-created promotional materials.

You represent that you have the necessary rights and that the content complies with the Community Standards. Feedback and ideas may be used without restriction or compensation, but Company does not acquire ownership of your pre-existing intellectual property merely because you give feedback.

10. Community, Fair Play, and Prohibited Conduct

You must follow the Community Standards and Fair Play Policy. Prohibited conduct includes cheating, bots, unauthorized automation, exploiting defects, match fixing, multi-account abuse, harassment, doxxing, impersonation, scams, unauthorized commercial activity, wallet manipulation, wash trading, market manipulation, money laundering, and attempts to bypass security or eligibility controls.

Do not access source code, systems, accounts, wallets, or data without authorization; interfere with service; distribute malware; scrape protected data; or use the Platform to violate another person's rights. Good-faith security reports sent to admin@psrgame.com will be evaluated separately from abuse.

11. Competitions, Rewards, and Promotions

All races, brackets, leaderboards, challenges, drops, giveaways, and reward programs are subject to the Competition and Rewards Rules plus an Event Card when applicable. Server records control unless a verified error is found.

No feature constitutes gambling or wagering unless Company expressly identifies it as lawfully offered in your jurisdiction. Off-platform bets, side wagers, and match-fixing arrangements are prohibited. Chance-based promotions must provide a no-purchase method of entry where required.

12. Third-Party Services

The Platform may interoperate with wallets, Base, payment processors, marketplaces, hosting providers, identity or sanctions vendors, social networks, and other third parties. Their terms and privacy practices apply independently. Company does not control decentralized networks or third-party services and is not responsible for their acts, outages, insolvency, security, or changes, except where law imposes responsibility on Company.

13. Moderation, Investigations, and Enforcement

We may review reports, telemetry, public blockchain data, transaction patterns, and gameplay records to enforce these Terms. Measures may include warnings, content removal, reward reversal before final settlement, matchmaking limits, feature restrictions, transaction holds where technically possible, account suspension, or termination.

Enforcement will be proportionate where practicable. You may appeal through the process in the Community Standards. We may preserve evidence, cooperate with lawful requests, and refer suspected crimes or security threats to appropriate authorities.

14. Suspension, Termination, and Asset Consequences

You may stop using the Platform and request account closure. Company may suspend or terminate access for material or repeated breach, fraud, cheating, security risk, legal requirement, nonpayment, or danger to users or the Platform. Immediate action may occur where delay would create risk.

Termination ends Platform licenses and may end access to off-chain items and gameplay utility. A self-custodied blockchain asset may remain at its address, but Company may lawfully block that asset or wallet from Platform features. Company cannot reverse or retrieve a completed public-chain transfer. Sections intended by nature to survive termination remain effective.

15. Updates to the Platform and These Terms

We may update the Platform and these Terms. We will post an updated date and provide additional notice for material changes as required by law. Material changes apply prospectively after notice, except an immediate change may be necessary for security, fraud prevention, or legal compliance.

If you do not accept a material update, stop using the affected services before it takes effect. A change to arbitration will not retroactively alter a dispute already properly noticed unless both sides agree.

16. Disclaimers

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE PLATFORM IS PROVIDED "AS IS" AND "AS AVAILABLE." COMPANY DISCLAIMS IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, QUIET ENJOYMENT, AND WARRANTIES ARISING FROM COURSE OF DEALING.

WE DO NOT GUARANTEE UNINTERRUPTED SERVICE, ERROR-FREE SOFTWARE, CONTINUOUS GAMEPLAY UTILITY, MATCHMAKING, ASSET VALUE, LIQUIDITY, REWARDS, BLOCKCHAIN FINALITY, OR THAT A DIGITAL ASSET WILL REMAIN ACCESSIBLE OR LAWFUL IN EVERY JURISDICTION. THESE DISCLAIMERS DO NOT EXCLUDE WARRANTIES THAT CANNOT LAWFULLY BE EXCLUDED.

17. Limitation of Liability

TO THE MAXIMUM EXTENT PERMITTED BY LAW, COMPANY AND ITS AFFILIATES, OWNERS, OFFICERS, EMPLOYEES, AND LICENSORS WILL NOT BE LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, CONSEQUENTIAL, OR PUNITIVE DAMAGES; LOST PROFITS, REVENUE, DATA, GOODWILL, OR OPPORTUNITY; OR LOSSES CAUSED BY WALLET COMPROMISE, MARKET MOVEMENT, NETWORK FAILURE, USER ERROR, OR THIRD-PARTY SERVICES.

THEIR TOTAL AGGREGATE LIABILITY ARISING FROM THE PLATFORM WILL NOT EXCEED THE GREATER OF USD \$100 OR THE AMOUNT YOU PAID DIRECTLY TO COMPANY FOR THE AFFECTED SERVICE DURING THE 12 MONTHS BEFORE THE EVENT. THIS LIMIT DOES NOT APPLY TO LIABILITY THAT CANNOT LAWFULLY BE LIMITED, INCLUDING CERTAIN FRAUD, WILLFUL MISCONDUCT, PERSONAL INJURY, OR STATUTORY CONSUMER RIGHTS.

18. Indemnity

To the extent permitted by law, you will defend, indemnify, and hold Company and its affiliates harmless from third-party claims and reasonable costs arising from your unlawful conduct, your infringement of another's rights, your User Content, or your material breach. This duty does not apply to the extent a claim was caused by Company's own negligence or misconduct, and consumer rights remain unaffected.

19. Informal Dispute Resolution

Before filing arbitration or suit, send a signed, individualized notice to admin@psrgame.com and by mail to NyFTee Original LLC, Attn: Legal, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States. State your name, account identifier, wallet address if relevant, facts, requested relief, and contact information. The parties will attempt in good faith to resolve the dispute for 30 days. Limitation periods are tolled during that period where permitted.

20. Individual Arbitration and Class-Action Waiver

Except for qualifying small-claims matters, claims for public injunctive relief that applicable law requires a court to decide, intellectual-property misuse, or a party's request for emergency relief, any dispute arising from the Platform or these Terms will be resolved by binding individual arbitration administered by the American Arbitration Association under its Consumer Arbitration Rules then in effect.

The Federal Arbitration Act governs this section. Hearings may occur by video, telephone, documents, or in Pima County, Arizona, unless consumer law requires another location. Company will pay fees it is required to pay under the AAA Consumer Rules. The arbitrator may award the same individual relief a court could award and will issue a reasoned decision.

YOU AND COMPANY WAIVE JURY TRIAL AND AGREE TO BRING CLAIMS ONLY INDIVIDUALLY, NOT AS A CLASS, COLLECTIVE, CONSOLIDATED, OR REPRESENTATIVE ACTION, EXCEPT WHERE THAT WAIVER IS UNENFORCEABLE. If this individual-action requirement is finally found unenforceable for a particular claim or remedy, that portion will be decided by a court after arbitrable issues are completed.

You may opt out of arbitration by emailing admin@psrgame.com within 30 days after first accepting these Terms. Include your full name, account email, postal address, and a clear statement that you opt out. Opting out does not affect access and does not opt you out of any prior valid arbitration agreement.

21. Governing Law and Courts

Arizona law governs, without regard to conflict-of-law rules, except the Federal Arbitration Act governs arbitration. For claims not subject to arbitration, the parties consent to the state and federal courts located in Pima County, Arizona. Mandatory laws and courts available to consumers in their home jurisdiction remain available to the extent they cannot lawfully be waived.

22. General Terms

These Terms and incorporated policies are the entire agreement about the Platform unless a signed agreement says otherwise. If a provision is unenforceable, it will be narrowed or severed while the remainder continues. No waiver is continuing. You may not assign these Terms without consent; Company may assign them with the business or assets, subject to law. Headings are for convenience. Electronic notices and records satisfy writing requirements where lawful. English controls, subject to mandatory local-language rights.

23. Contact

Legal notices and privacy requests: admin@psrgame.com. Mail: NyFTee Original LLC, Attn: Legal, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States. Current legal documents are available at <https://psrgame.com/legal>.

End User License Agreement

Software terms for the website, clients, launchers, and Game Modes

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

This EULA supplements the Platform Terms of Service and governs software made available by NyFTee Original LLC.

1. Scope and Relationship to the Platform Terms

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

This EULA applies to browser-delivered code, downloadable applications, launchers, builds, patches, APIs exposed to players, audiovisual assets, documentation, and related software (the "Software"). The Platform Terms control generally; this EULA controls only if a conflict concerns the Software license.

2. License Grant

Subject to the legal documents and your continued eligibility, Company grants you a personal, limited, non-exclusive, non-sublicensable, non-transferable, revocable license to install, execute, and use the Software on devices you own or control solely for lawful personal gameplay and approved creator activity.

The Software is licensed, not sold. No title to Software or Platform intellectual property transfers to you.

3. License Restrictions

Except where applicable law expressly prevents restriction, you may not:

- Copy, distribute, rent, lease, sell, sublicense, publicly perform, or commercially exploit the Software except through an authorized Company feature.
- Reverse engineer, decompile, disassemble, derive source code, circumvent technical protection, or modify the Software.
- Create or use unauthorized servers, clients, emulators, bots, scripts, macros, overlays, plug-ins, trainers, cheats, packet tools, or automation.
- Scrape protected data, intercept traffic, manipulate timing or inputs, exploit bugs, duplicate items, spoof identity or location, or evade a ban.
- Use the Software for unlawful financial activity, wagering, infringement, harassment, malware, unauthorized computing, or security testing without written permission.

4. Updates, Patches, and Technical Requirements

The Software may update automatically. Updates may alter features, balance, compatibility, security, minimum requirements, and data formats. You authorize installation of security and integrity updates reasonably necessary to continue using the Platform.

We may discontinue support for obsolete versions after reasonable notice where practicable. You are responsible for compatible hardware, software, connectivity, data charges, wallet software, and device security.

5. Anti-Cheat and Integrity Technology

To protect fair play, the Software may collect and evaluate gameplay events, client configuration, process or file indicators relevant to cheating, device identifiers, network signals, and public wallet activity as described in the Privacy Policy. Monitoring must be proportionate and limited to legitimate security, fraud, and fair-play purposes.

You must not disable or interfere with integrity controls. Significant automated enforcement decisions may be appealed through the Community Standards process.

6. Ownership and Reserved Rights

Company and its licensors own the Software and all associated copyrights, patent rights, trade secrets, trademarks, designs, databases, and other rights. All rights not expressly granted are reserved. A digital asset license does not grant rights in the Software or Company marks.

7. Open-Source and Third-Party Components

Specific components may be governed by separate open-source or third-party licenses. Those licenses control for their components. Third-party platforms, wallets, Base, payment services, storefronts, and device systems may impose separate terms and are not licensed under this EULA.

8. User Content, Replays, and Creator Tools

User Content remains governed by the Platform Terms. You may capture and share gameplay using approved tools for personal or creator purposes, provided you do not falsely imply endorsement, reveal confidential builds, misuse music or third-party rights, monetize prohibited content, or interfere with gameplay.

9. Virtual Items and Digital Assets

The Software may display or enable use of off-chain items and on-chain assets. Software access, gameplay utility, and intellectual-property licenses are distinct from ownership of a blockchain token. The Web3 Terms and NFT License control those rights. Deleting Software does not reverse blockchain transactions.

10. Suspension and Termination

This EULA begins on acceptance and ends when terminated. It terminates automatically upon a material breach that is not cured where cure is appropriate. Company may suspend the license while investigating credible security, fraud, or cheating concerns. On termination, stop using and delete copies under your control, except components lawfully retained under separate licenses.

11. Export and Sanctions Compliance

You may not export, re-export, access, or use the Software in violation of U.S. or other applicable sanctions and export controls. You represent that you are not a prohibited party and are not using the Software from a blocked location. Company may use screening and geographic controls.

12. U.S. Government End Users

The Software is commercial computer software and commercial computer software documentation. U.S. Government end users receive only the rights granted to other end users under this EULA, consistent with applicable procurement law.

13. Warranty, Liability, and Disputes

The warranty disclaimers, limitation of liability, indemnity, informal-resolution process, arbitration agreement, class-action waiver, governing law, and mandatory consumer-law savings clauses in the Platform Terms are incorporated here.

14. Contact

Questions about this EULA: admin@psrgame.com. Mail: NyFTee Original LLC, Attn: Legal, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States.

Privacy Policy

Global privacy notice for the Platform and all Game Modes

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

This Policy explains what personal data NyFTee Original LLC collects, why it is used, how it is shared and retained, and the choices and rights available to players worldwide.

1. Scope and Controller

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

NyFTee Original LLC is the controller or business responsible for personal data covered by this Policy. Our address is 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States. Contact admin@psrgame.com for privacy matters.

This Policy applies to the Platform, Game Modes, accounts, purchases, support, events, marketplace functions, wallet connections, official communities we control, and related websites. Third parties process data under their own notices when they act independently.

2. Data We Collect

Depending on how you use the Platform, we collect:

- Account and identity data: name or display name, email, age confirmation, country or region, authentication records, and account identifiers.
- Wallet and blockchain data: public wallet addresses, signatures used for authentication, token balances relevant to Platform functions, public transaction history, and smart-contract interactions. We do not request or store private keys or seed phrases.
- Gameplay and economy data: Game Mode activity, controls, results, progression, inventory, rewards, matchmaking, achievements, marketplace actions, fraud indicators, and anti-cheat telemetry.
- Purchase and transaction data: items, amounts, currency, timestamps, receipts, payment status, tax location, chargebacks, and limited payment metadata. Payment processors generally receive full card or funding details directly.
- Device, network, and usage data: IP address, device and browser type, operating system, language, identifiers, log events, crash data, approximate location derived from IP, referral source, and cookie or similar-technology data.
- Communications and content: support requests, reports, appeals, survey responses, feedback, public posts, usernames, uploads, chat or moderation records where available, and correspondence.
- Verification and compliance data: identity, age, location, sanctions, tax, or eligibility information when required for prizes, withdrawals, regulated features, fraud prevention, or law.
- Inferences: risk, fraud, moderation, skill, matchmaking, and preference inferences derived from the categories above.

3. Sources of Data

We obtain data:

- Directly from you when you register, play, connect a wallet, purchase, communicate, enter an event, or exercise rights.
- Automatically from devices, software, cookies, logs, and gameplay systems.
- From public blockchains and blockchain indexing services.
- From payment, identity, fraud, sanctions, analytics, hosting, marketplace, social-login, and customer-support providers.
- From other users, moderators, rights holders, event partners, and lawful public sources.

4. Why We Use Data and Legal Bases

We do not use a wallet signature to obtain ownership of assets or permission to move assets unless the transaction request clearly and separately discloses that result.

We use personal data for the following purposes and legal bases:

- Contract: create and secure accounts; authenticate users and wallets; operate Game Modes; deliver purchases; maintain inventory; process rewards; provide support; and administer competitions.
- Legitimate interests: prevent fraud, cheating, abuse, and security incidents; maintain service reliability; analyze performance; improve gameplay; protect users and rights; moderate content; and establish or defend legal claims.
- Consent: use non-essential cookies or targeted advertising where applicable; send optional marketing; process data for a purpose that law requires you to approve; and obtain any permission required for immediate digital delivery.
- Legal obligations: maintain financial and tax records; respond to lawful process; perform required sanctions, age, identity, prize, and compliance checks; and meet consumer, privacy, and safety duties.
- Vital or public interests: address an imminent threat to a person, the Platform, or the public where law recognizes that basis.

5. How We Disclose Data

We disclose data only as reasonably necessary to:

- Service providers processing hosting, content delivery, databases, authentication, security, analytics, support, email, payments, tax, identity, sanctions, fraud, and moderation under contractual restrictions.
- Independent services such as payment processors, wallets, Base, marketplaces, social platforms, and app stores when you direct or use the integration.
- Other players and the public for usernames, profiles, leaderboards, match results, public posts, creator content, marketplace listings, and public blockchain activity.
- Professional advisers, auditors, insurers, investors, and transaction counterparties under confidentiality and due-diligence safeguards.
- Authorities, rights holders, affected parties, or courts when reasonably necessary to comply with law, enforce rights, prevent harm, investigate misconduct, or protect security.
- A buyer, successor, or reorganized entity in a merger, financing, asset sale, insolvency, or similar transaction, subject to applicable notice and privacy requirements.

6. Public Blockchains

Public blockchain records are visible worldwide and may permanently associate a wallet address with transactions, assets, and other public data. Company does not control Base validators, explorers, indexers, wallets, or independent copies of the ledger and generally cannot edit or delete confirmed blockchain data.

A privacy request can apply to Company-controlled profiles, links, indexes, and off-chain records, but it cannot require Company to alter a public decentralized ledger it does not control. Consider using a wallet address that does not reveal unnecessary personal information.

7. Sale, Sharing, and Targeted Advertising

We do not sell personal data for money. We do not knowingly sell or share personal data of anyone under 18 because minors may not use the Platform.

If we use advertising or analytics technology that qualifies as a sale, sharing, or targeted advertising under applicable law, we will provide a clear opt-out control and honor legally recognized browser-based opt-out preference signals, including Global Privacy Control, where required. We will not use sensitive personal data to infer characteristics beyond permitted purposes.

8. Retention

We keep personal data only as long as reasonably necessary for the purposes described, including account operation, security, disputes, tax, fraud prevention, and legal obligations. We may retain de-identified or aggregated information that cannot reasonably identify you. Public blockchain data is retained by the network, not according to Company's deletion schedule. Typical target periods are:

- Active account and core gameplay records: for the account's life, then generally up to 3 years after closure unless a longer period is needed for ownership, fraud, disputes, or law.
- Purchase, payout, tax, and financial records: generally 7 years or the period required by applicable law.
- Security, sanctions, anti-cheat, and fraud records: generally up to 5 years after the relevant event, longer for an active investigation or repeat-abuse defense.
- Support, moderation, and appeal records: generally 3 years after closure of the matter.
- Raw technical and analytics logs: generally up to 12 months, then deleted or aggregated unless needed for security or debugging.
- Consent and legal-acceptance records: for the relationship plus the applicable limitation period.
- Backups: removed or overwritten on a rolling schedule, generally within 90 days after source deletion, subject to disaster-recovery integrity.

9. Security

We use administrative, technical, and organizational safeguards designed for the nature of the data and risks. These may include access controls, encryption in transit, credential protection, logging, testing, vendor review, least-privilege access, and incident response. No system, wallet, or blockchain is completely secure. Protect your devices and credentials and report suspected compromise to admin@psrgame.com.

10. International Data Transfers

Company is based in the United States and processes data there and in other countries where providers operate. These countries may have different privacy laws. Where required, we use recognized safeguards such as adequacy decisions, standard contractual clauses, the UK International Data Transfer Addendum or Agreement, or another lawful transfer mechanism. You may request information about applicable safeguards.

11. Your Privacy Rights

Subject to identity verification, legal exceptions, and regional applicability, you may request access, confirmation, correction, deletion, portability, restriction, objection, withdrawal of consent, or a list of categories and recipients. You may opt out of sale, sharing, targeted advertising, or certain profiling where law provides that right.

Submit requests to admin@psrgame.com or through <https://psrgame.com/legal/privacy-request>. We will not discriminate against you for exercising a right. An authorized agent may act where permitted, but we will verify authority and identity. If we deny a request, you may appeal by replying with "Privacy Appeal" or emailing admin@psrgame.com. You may also complain to your local privacy regulator.

12. EEA, Switzerland, and United Kingdom

Where the GDPR, UK GDPR, or comparable law applies, you have the rights described above and the right to lodge a complaint with a supervisory authority. Contract and legitimate-interest processing is limited to what is necessary and proportionate. You may object to legitimate-interest processing, and we will stop unless compelling lawful grounds or legal claims justify continuation.

Company will identify any legally required representative or data protection officer on the live Privacy page if and when that appointment becomes required. Mandatory local rights are not limited by this Policy.

13. U.S. State Privacy Notices

Residents of states with comprehensive privacy laws may have rights to know, access, correct, delete, port, opt out of sale or sharing, opt out of targeted advertising or qualifying profiling, limit certain sensitive-data uses, and appeal. We extend the core request process in Section 11 to users worldwide when reasonably feasible, even if a statute does not require it.

Categories collected and disclosed are listed in Sections 2 and 5; purposes are in Section 4; retention is in Section 8. We do not offer financial incentives in exchange for personal data unless we first provide a legally required notice explaining material terms.

14. Automated Decisions and Anti-Fraud

We use automated systems to support matchmaking, recommendations, fraud detection, anti-cheat, sanctions screening, moderation, and security. These systems may flag or temporarily limit activity. Where law provides a right regarding a decision with legal or similarly significant effects, you may request information and human review through the appeal process.

15. Minors

The Platform is for adults 18 and older. We do not knowingly collect personal data from minors. If we learn that a minor created an account, we will restrict it and delete or retain data as required for safety, fraud prevention, and law. Report suspected minor use to admin@psrgame.com.

16. Cookies and Communications

The Cookie Policy explains browser storage and choices. You may unsubscribe from promotional email through the message control. We may still send transactional, security, legal, or service communications. Browser Do Not Track signals are not standardized; we honor legally recognized opt-out preference signals as described above.

17. Changes to This Policy

We may update this Policy as the Platform, vendors, or law changes. The updated date will appear at the top. We will provide additional notice and obtain consent where required for a material new use. Earlier versions will remain available through the Legal Center.

18. Contact

Privacy and legal contact: admin@psrgame.com. Mail: NyFTee Original LLC, Attn: Privacy, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States. Website: <https://psrgame.com/legal/privacy>.

Cookie Policy

Cookies and similar technologies across the Platform

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

This Policy explains browser storage, pixels, local storage, SDKs, and similar technology used by Pink Slip Arcade.

1. Scope

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

This Cookie Policy is part of the Privacy Policy and applies to websites, web applications, and Software that use browser storage or similar identifiers.

2. What These Technologies Do

Cookies are small files stored by a browser. Local storage, pixels, tags, and software development kits can perform similar functions. They may remember a session, preserve preferences, measure performance, prevent fraud, or support features requested by you.

3. Categories We Use

Technology may fall into these categories:

- Strictly necessary: authentication, session continuity, wallet connection state, security, fraud prevention, load balancing, consent records, checkout, and requested functions. These cannot usually be disabled through our control without breaking the service.
- Functional: language, display, accessibility, remembered settings, and optional convenience features.
- Analytics and performance: aggregated or pseudonymous information about visits, errors, responsiveness, navigation, and feature use so we can improve the Platform.
- Advertising: campaign measurement, audience selection, or cross-site targeted advertising. Pink Slip Arcade will not activate non-essential advertising technology without the notice, choice, and consent required by applicable law.

4. Consent and Legal Basis

Strictly necessary technology is used to provide a requested service, secure the Platform, or pursue legitimate operational interests. Where law requires consent for functional, analytics, or advertising technology, those categories remain off until you choose them.

Rejecting non-essential technology must be as accessible as accepting it. Withdrawal is available at any time through Cookie Settings and does not affect prior lawful processing.

5. Current Controls and Cookie Registry

Use the "Cookie Settings" control in the Platform footer or at <https://psrgame.com/legal/cookies> to review current categories and change choices. The live registry must identify active vendor or first-party names, purposes, categories, and durations. The live registry is operational information and may change as vendors change without altering the legal commitments in this Policy.

Where required, Pink Slip Arcade honors Global Privacy Control or another legally recognized opt-out preference signal for sale, sharing, or targeted advertising.

6. Typical Durations

Session technology normally expires when the browser or session closes. Persistent authentication and preference technology is generally kept for up to 12 months, consent records for up to 24 months or as needed to prove choice, and analytics identifiers for up to 13 months, unless the live registry states a shorter period or law requires another period.

7. Browser and Device Choices

You may delete or block cookies using browser settings, reset device identifiers, or limit tracking through device controls. Blocking strictly necessary technology may prevent login, wallet connection, purchases, or gameplay. Choices are generally browser- and device-specific.

8. Third Parties

Independent services such as payment processors, embedded media, wallets, marketplaces, or social features may place technology under their own policies when you use them. We require contracted processors to use data only for authorized purposes, but independent controllers manage their own choices and retention.

9. Changes and Contact

We may update this Policy and the live registry. Material changes will receive notice as required. Questions: admin@psrgame.com. Mail: NyFTee Original LLC, Attn: Privacy, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States.

Web3, Digital Asset and Play-to-Earn Terms

Risk disclosures and safeguards for Base, wallets, Platform Tokens, NFTs, and rewards

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

These specialized terms govern every on-chain feature and every reward with possible external value. They supplement the Platform Terms.

1. Scope and Key Terms

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

"Digital Asset" means any token, NFT, collectible, wallet-linked entitlement, or blockchain record used with the Platform.

"Platform Token" means any fungible Platform-linked token officially identified by Company, if and when lawfully deployed, plus any clearly disclosed successor. "Play-to-Earn" or "P2E" means gameplay that may make a reward available; it does not mean guaranteed income or profit.

"Base" means the third-party public blockchain network and related infrastructure. Company does not own or control Base, independent wallets, validators, sequencers, bridges, explorers, marketplaces, or exchanges.

2. Your Wallet and Self-Custody

Unless a feature clearly says otherwise, you use a self-custody wallet. You alone control private keys and authorize transactions. Company does not possess your private key, cannot restore a seed phrase, cannot stop a valid public-chain transfer, and cannot retrieve an asset sent to the wrong address or incompatible contract.

Verify the network, wallet address, contract address, token approval, quantity, fees, and transaction effect before signing. A signature may authenticate you or authorize an asset action; the interface must identify which. Never sign an unreadable or unexpected request.

3. Blockchain Finality and Fees

Blockchain transactions are normally irreversible after submission or confirmation. They may be delayed, reordered, dropped, replaced, or affected by congestion, sequencer issues, forks, reorganization, validator behavior, software defects, or protocol changes.

You are responsible for network fees and third-party charges displayed or inherent in the transaction. Estimated fees may change before execution. Company does not guarantee transaction timing or finality.

4. Utility, Ownership, and No Investment Promise

Digital Assets are intended for gameplay, collection, access, expression, or other disclosed utility. Owning a token does not by itself transfer copyright, equity, debt, dividends, revenue share, governance over Company, or a claim against Company. NFT artwork rights are defined only by the NFT License.

Digital Assets are not offered as bank deposits, savings products, legal tender, or guaranteed investments. Company does not promise appreciation, a secondary market, liquidity, buybacks, price support, yield, passive return, or profits from Company's managerial efforts. Descriptions focus on consumptive Platform use.

Regulatory classification depends on facts and law, not labels. Company may restrict, redesign, delay, or discontinue a feature where needed for compliance.

5. P2E Rewards

A P2E reward is a gameplay incentive, not wages, employment, guaranteed compensation, or a promise that play will be profitable. Rewards may depend on skill, eligibility, anti-cheat review, supply, season rules, economy controls, taxes, minimum thresholds, and technical availability.

Reward rates, sinks, utility, claim windows, eligibility, and distribution methods may change prospectively to protect balance, prevent exploitation, comply with law, or preserve the Platform. Earned and finally delivered on-chain assets will not be removed from a self-custody wallet by Company, but their Platform utility or eligibility may change lawfully.

No reward has a guaranteed fiat value or guaranteed cash-out path. Any conversion or sale occurs through a legally available feature or independent third party at your risk.

6. Digital Asset Risks

Never spend funds you cannot afford to lose. Pink Slip Arcade does not provide investment, legal, accounting, or tax advice.

By using Web3 features, you understand material risks including:

- Total or substantial loss of market value, illiquidity, volatility, slippage, or inability to sell.
- Wallet compromise, phishing, malicious approvals, malware, SIM swapping, social engineering, or lost credentials.
- Smart-contract, bridge, oracle, indexer, marketplace, sequencer, validator, protocol, or interface defects and exploits.
- Incorrect addresses, networks, token standards, signatures, metadata, or tax treatment.
- Forks, airdrops, protocol changes, chain congestion, downtime, transaction reorganization, or unsupported assets.
- Regulatory, enforcement, banking, payment, sanctions, tax, securities, commodities, money-transmission, gaming, or consumer-law changes.
- Counterfeit collections, impersonation, wash trading, manipulated prices, false listings, or third-party insolvency.
- Loss of gameplay utility, interoperability, hosting, metadata availability, or community interest.

7. Marketplace and Transfers

A Company interface may display or route a listing, mint, transfer, purchase, or sale. Unless expressly stated, Company is not the custodian, broker, exchange, counterparty, fiduciary, or guarantor. A smart contract or third party may execute settlement.

You must verify authenticity, collection address, token ID, attributes, license, price, fees, royalties, taxes, and counterparty risk. Listings may be inaccurate, stale, fraudulent, or affected by third-party rules. Company may delist or block Platform display without altering the public ledger.

8. No Unauthorized Custody, Exchange, or Transmission

Company will not accept and transmit Digital Assets for users, hold user assets in pooled custody, redeem a Platform Token for fiat, operate an exchange, or provide another regulated financial service unless the feature is separately reviewed, lawfully structured, clearly disclosed, and supported by required registrations, licenses, or regulated providers.

Internal game accounting, off-chain points, and smart-contract interactions will not be marketed as a way to evade financial regulation. Company may pause or limit a feature while its classification is reviewed.

9. Compliance, Verification, and Restricted Persons

Company may screen wallet addresses and request identity, age, location, source-of-funds, tax, sanctions, or beneficial-ownership information where reasonably necessary. We may reject, hold, report, or block activity when required by law or when credible fraud, sanctions, laundering, exploitation, or security risk exists.

You may not use mixers or obfuscation to evade compliance, transact for a restricted person, manipulate prices or rewards, wash trade, self-deal deceptively, structure transactions to avoid controls, use stolen assets, or misrepresent beneficial ownership.

10. Smart Contracts, Administrative Controls, and Changes

Official contract addresses will be published through verified Company channels. Do not rely on direct messages, advertisements, search results, or unofficial links. Smart-contract code may include disclosed controls such as pausing, allowlists, deny lists, upgradeability, royalties, metadata controls, claim limits, or treasury permissions.

Audits reduce but do not eliminate risk. Company will disclose material administrative controls and known contract migrations. A fork, exploit, legal order, or critical defect may require pausing the interface, supporting a migration, or selecting a canonical version for Platform utility.

11. Taxes and Records

Digital Asset purchases, rewards, prizes, transfers, exchanges, dispositions, and airdrops may be taxable. You are responsible for determining, reporting, and paying taxes. Company may collect tax forms, withhold amounts, report information, or deny a reward until required documentation is complete. Keep independent records of wallet activity, value, basis, fees, and dates.

12. Consumer Disclosures and Immediate Delivery

Before a paid mint, claim, or transfer, the interface will display material price, fee, asset, network, delivery, utility, transfer, and refund information. Where law provides a cooling-off right for digital content or service, we will request any legally required express consent to immediate performance and acknowledgment that the withdrawal right may be lost after performance begins. Non-waivable remedies for faulty or misdescribed content remain.

13. Suspension and Termination

Company may restrict a wallet or Digital Asset from Platform functions for sanctions, fraud, cheating, legal process, security, or material breach. A public token may remain in self-custody, but access, rewards, display, matchmaking, or utility may be denied. We are not required to facilitate a transfer that would violate law or technical security.

14. Disclaimers and Liability

The Platform Terms' disclaimers and liability limits apply. Without limiting them, Company is not liable for market loss, impermanent or permanent loss caused by wallet compromise, wrong-address transfers, third-party protocols, chain behavior, smart-contract exploits outside Company's reasonable control, or legal changes, except to the extent liability cannot lawfully be excluded.

15. Contact

Web3 legal and risk questions: admin@psrgame.com. Official legal center: <https://psrgame.com/legal>.

NFT License and Digital Collectibles Terms

What collectors own, what artwork rights they receive, and what remains with the creator

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

These terms apply to official Pink Slip Arcade NFTs and other blockchain collectibles unless a collection page expressly provides a different signed license.

1. Scope and Relationship

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

This NFT License supplements the Platform Terms and Web3 Terms. The official collection page identifies the contract address, chain, supply or mint rules, artwork or metadata, and any collection-specific utility. An unauthorized copy, counterfeit token, or token minted from an unofficial contract receives no rights.

2. Token Ownership Is Not Copyright Ownership

When you lawfully acquire an official NFT, you own the blockchain token associated with the token ID, subject to the network and smart contract. You do not acquire copyright, trademark, patent, personality, publicity, or other intellectual-property ownership in artwork, vehicle design, animation, audio, brand, metadata, game code, or other content linked to the token.

Company and its licensors retain all intellectual-property rights except the limited license below. Ownership language refers to the token and permitted Platform use, not ownership of Company or its intellectual property.

3. Holder License

While you lawfully own an official NFT, Company grants you a worldwide, non-exclusive, royalty-free, non-sublicensable license to display the associated artwork for personal, non-commercial purposes; use it as a personal profile image or avatar; show it in a personal gallery or marketplace listing; and use the NFT in supported Platform Game Modes according to current rules.

The license does not permit merchandise, paid advertising, commercial branding, media productions, derivative collections, tokenization, fractionalization, or other commercial exploitation without a separate written license. A collection page may grant broader commercial rights, but only if it clearly says so.

4. Prohibited Uses

You may not use the NFT or associated content to:

- Promote hate, harassment, unlawful discrimination, explicit sexual content, violence against a protected person, fraud, malware, illegal goods, or unlawful activity.
- Remove notices, misrepresent authorship, imply Company sponsorship, or combine Company marks with another brand in a misleading way.
- Create confusingly similar collections, counterfeit tokens, unauthorized derivatives, or registrations claiming Company intellectual property.
- Use an unlawfully obtained, stolen, sanctioned, or fraudulently transferred token.
- Interfere with game balance, evade enforcement, or violate the Platform Terms.

5. Transfer of the NFT

You may transfer or sell an official NFT where lawful and technically supported. Your holder license ends automatically when you no longer own the token and passes to the lawful new owner subject to these terms. You must not transfer to evade sanctions, enforcement, taxes, or another legal obligation.

Company does not guarantee a marketplace, buyer, floor price, royalty payment, or enforceability of creator royalties. Marketplace and network fees may apply.

6. Platform Utility and Cross-Game Use

An NFT may be usable across multiple Pink Slip Arcade Game Modes. That connected use does not guarantee identical stats, performance, visual treatment, balance, or perpetual compatibility in every mode. Each mode may interpret the asset through its own fair, disclosed gameplay rules.

Company may rebalance, patch, restrict, migrate, suspend, or retire utility when reasonably necessary for security, fairness, technical integrity, law, or the Platform economy. The token may continue to exist even if a particular utility ends.

7. Metadata, Media, and Storage

Metadata or media may be stored on decentralized storage, Company-controlled systems, third-party systems, or a combination. Availability can be affected by gateways, hosting, domains, pinning, formats, and third-party failure. Company will use commercially reasonable efforts to preserve official collection metadata but does not promise permanent uninterrupted availability unless the collection page expressly guarantees immutable on-chain storage.

8. Authenticity and Infringing Content

Official contract addresses published through verified Company channels control authenticity. Similar names, artwork, or marketplace badges are not sufficient. If Company learns that licensed content infringes a third party's rights, it may replace or disable Company-controlled media or utility as reasonably necessary, without altering an immutable token where alteration is impossible.

9. Enforcement and Termination of License

The holder license terminates upon transfer, material breach, unlawful acquisition, or use prohibited by Section 4. Where cure is appropriate, Company may give notice and an opportunity to cure. A terminated license may be restored in writing after cure, but the token's mere presence in a wallet does not restore rights.

10. No Investment or Value Warranty

NFTs are collectibles and gameplay assets, not promises of profit. Company does not guarantee scarcity beyond the disclosed contract, market value, liquidity, interoperability outside the Platform, future rewards, or appreciation. The Web3 Terms' risk disclosures apply.

11. Contact

NFT rights and licensing questions: admin@psrgame.com. Verify official collections through <https://psrgame.com>.

Competition, Rewards and Promotions Rules

Master rules for races, brackets, leaderboards, drops, giveaways, and reward events

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

These master rules apply across all Game Modes. An Event Card supplies the dates, scoring, entry method, reward, and other event-specific facts without requiring a new platform agreement.

1. Scope

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

These Rules apply to Company-operated skill competitions, races, brackets, leaderboards, challenges, drops, reward campaigns, and chance-based promotions. They do not authorize a feature that is unlawful in a participant's location.

2. Event Card

Each event must display or link an Event Card before entry. The Event Card states the sponsor, Game Mode, eligibility, start and end time with time zone, entry method and limit, any cost, format, scoring, tie-breakers, reward description and approximate value, claim deadline, winner selection, and material geographic restrictions.

The Event Card controls only those operational facts. These master Rules, Platform Terms, and specialized policies control legal rights. If an Event Card is materially incomplete, Company may pause entry until corrected.

3. Eligibility

Participants must be at least 18, have an account in good standing, satisfy the Event Card, complete required verification, and be located where the event is lawful. Company personnel, contractors working on the event, and their immediate household members may be excluded where stated or required.

Company may exclude jurisdictions, wallets, payment methods, or persons due to sanctions, prize, tax, gaming, consumer, or other legal restrictions. VPN or location spoofing to evade restrictions is prohibited.

4. Skill Competitions

A skill competition is determined by disclosed gameplay performance, not a random drawing. The Event Card must explain scoring and tie-breakers. Connection quality, device capability, latency, and player decisions may affect results. Unless a verified error exists, authoritative server and blockchain records control.

No player may bet against the house or another player through an unauthorized wager. A paid-entry prize competition will be offered only after Company confirms it is lawful in the participant's location and displays all required terms.

5. Chance-Based Promotions and Giveaways

A chance-based promotion must state "NO PURCHASE NECESSARY" and provide a free alternative method of entry where required. A purchase will not improve odds unless lawfully permitted and clearly disclosed. Odds depend on the number of eligible entries unless the Event Card states fixed odds.

The Event Card must provide entry dates, limits, random selection method, reward value, verification, and any legally required registration or bonding information. Void where prohibited. A social-media platform does not sponsor a promotion unless expressly stated.

6. Entries and Technical Requirements

Entries must be complete, timely, genuine, and submitted through the stated method. Automated, scripted, duplicated, purchased, bulk-generated, collusive, or fraudulent entries are void. Company timestamps and server records determine receipt. Participants are responsible for compatible devices and connectivity.

7. Fair Play and Integrity

Participants may not:

- Use cheats, bots, macros, unauthorized automation, exploits, prohibited hardware or software, account sharing, smurfing, collusion, intentional disconnection, match fixing, or result manipulation.
- Trade wins, coordinate bracket outcomes, harass opponents, interfere with streams, obtain nonpublic event information, or bribe another participant.
- Use multiple accounts or wallets to evade limits, sanctions, eligibility, skill tiers, cooldowns, or reward caps.
- Manipulate marketplaces or token activity to create a false appearance of eligibility, value, or activity.

8. Errors, Disconnects, and Replays

The Event Card may state disconnect and replay rules. Company may order a replay, restore entry, adjust a clearly erroneous score, or void an affected match when a verified server, contract, scoring, or integrity failure materially affected results. Ordinary player-side lag, device failure, or input error does not automatically require a replay.

If a widespread failure makes fair completion impossible, Company may pause, reschedule, modify, or cancel the affected event and provide a reasonable remedy consistent with law.

9. Rewards and Winner Verification

Rewards are subject to verification of identity, age, location, account, wallet control, fair play, sanctions status, tax information, and compliance with these Rules. A potential winner is not final until verified. Failure to respond or complete documents by the claim deadline may cause forfeiture and selection of an alternate.

Company may substitute a reward of equal or greater stated value if the original becomes unavailable, unless law prohibits substitution. Digital Asset values are approximate, can change rapidly, and are not guaranteed at delivery or later. Rewards are non-transferable before award unless the Event Card allows transfer.

10. Taxes and Publicity

Winners are responsible for taxes and may be required to provide tax forms. Company may report or withhold as required. Where lawful, a winner grants Company permission to publish username, country or region, gameplay, and reward for event administration and promotion. Mandatory consent or an opt-out will be provided where required.

11. Enforcement and Appeals

Company may disqualify an entry, reverse an unfinalized reward, suspend an account, or refer misconduct under the Community Standards. Material decisions may be appealed within 14 days through the event support channel or admin@psrgame.com. Evidence must be preserved during review. Fraudulent or abusive appeals may be closed.

12. Cancellation and Force Majeure

Company may modify, suspend, or cancel an event when fraud, attack, technical failure, legal change, disaster, war, labor disruption, network outage, or another event beyond reasonable control prevents fair or lawful administration. Company will not reduce a finally delivered on-chain reward, but may provide substitution or refund required by law.

13. Release and Disputes

To the extent permitted by law, participants release Company and event partners from claims arising from participation or reward use, except claims caused by their negligence, willful misconduct, or non-waivable duties. The Platform Terms' liability, arbitration, class-waiver, governing-law, and mandatory-rights clauses apply.

14. Contact

Event questions and integrity reports: admin@psrgame.com. Current Rules: <https://psrgame.com/legal/competition-rules>.

Community Standards and Fair Play Policy

Player conduct, anti-cheat, marketplace integrity, moderation, and appeals

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

Pink Slip Arcade is competitive, but competition never excuses abuse, cheating, fraud, or manipulation.

1. Scope

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

These standards apply to gameplay, accounts, profiles, usernames, chat, messages, uploads, live events, marketplaces, wallet-linked activity, official communities, support, and conduct outside the Platform when it creates a credible safety or integrity risk inside the Platform.

2. Respect and Safety

Do not:

- Threaten, harass, stalk, bully, sexually harass, or encourage violence or self-harm.
- Attack or exclude people using slurs or hateful conduct based on race, ethnicity, nationality, religion, sex, gender, sexual orientation, disability, age, veteran status, or another protected characteristic.
- Share private information, dox, swat, blackmail, extort, impersonate, or coordinate targeted abuse.
- Post sexual exploitation, non-consensual intimate material, graphic unlawful violence, or content that exploits a vulnerable person.
- Evade the 18+ rule or help a minor access the Platform.

3. Fair Play

Do not gain or distribute an unfair advantage through:

- Cheats, bots, macros, scripts, unauthorized automation, modified clients, memory tools, packet manipulation, prohibited overlays, input spoofing, or device manipulation.
- Exploits, item duplication, reward loops, map escapes, timing manipulation, intentional disconnects, or failure to report a severe economy or security defect.
- Account sharing, boosting, win trading, smurfing used to evade restrictions, multi-account farming, collusion, ghosting, stream sniping, bracket manipulation, or match fixing.
- False evidence, tampered screenshots, fabricated transactions, or interference with anti-cheat and telemetry.

4. Marketplace and Web3 Integrity

Do not:

- Scam, phish, impersonate staff, request private keys or seed phrases, distribute malicious links, or make false wallet-support claims.
- Wash trade, self-deal deceptively, spoof demand, manipulate prices or rewards, counterfeit collections, list stolen assets, launder proceeds, or evade sanctions screening.
- Misrepresent rarity, provenance, stats, licenses, utility, official contract addresses, or expected returns.
- Use off-platform payment or escrow arrangements to bypass safety controls or deceive another player.

5. Content and Communications

Username, posts, uploads, voice or text, and creator content must be lawful and rights-cleared. No spam, malware, piracy, fraudulent promotion, unauthorized advertising, misleading endorsements, or disruption. Criticism, rivalry, and competitive banter are allowed when they do not cross into targeted abuse or threats.

6. Security Research and Bug Reports

Do not test production systems without authorization. Send a good-faith report to admin@psrgame.com with reproduction steps and avoid accessing unnecessary data, causing harm, extorting payment, or publicly disclosing an unpatched issue. Company may publish a separate safe-harbor policy for authorized research.

7. Reporting

Use in-Platform reporting for urgent content, cheating, or fraud and preserve relevant usernames, match IDs, wallet addresses, transaction hashes, dates, and evidence. Do not weaponize reports, encourage mass false reporting, or retaliate against reporters. Emergencies and credible threats should also be reported to local emergency services.

8. Enforcement

Depending on severity, history, evidence, and risk, Company may educate, warn, mute, remove content, invalidate a result, reverse an unfinalized reward, restrict trading or matchmaking, temporarily suspend, permanently ban, block a wallet from Platform functions, preserve evidence, or refer a matter to a provider or authority.

Severe fraud, threats, exploitation, sanctions evasion, malware, account compromise, or attacks may result in immediate action. Enforcement does not require Company to alter or seize a self-custodied public-chain asset.

9. Notice and Appeals

Where practicable, a notice will identify the violated rule, action, duration, and appeal method without revealing detection methods or another person's private data. You may appeal a material suspension, permanent ban, or major reward decision within 14 days. Provide specific facts and new evidence.

A reviewer not responsible for the original decision will assess significant appeals where practicable. Outcomes may affirm, reduce, reverse, or remand the action. Repeated abusive appeals may be closed.

10. Transparency and Legal Requests

Company may publish aggregate moderation and enforcement information. We respond to valid legal process and may make emergency disclosures where law permits and an imminent risk exists. We will not disclose private reporter information merely to satisfy another user's curiosity.

11. Contact

Reports and appeals: admin@psrgame.com. Policy page: <https://psrgame.com/legal/community>.

Purchase, Cancellation and Refund Policy

Clear rules for digital content, subscriptions, mints, marketplace actions, and mistakes

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

This Policy supplements the Platform Terms and applies to purchases made directly from NyFTee Original LLC. Independent stores, payment providers, marketplaces, and sellers may apply separate rules.

1. Before You Buy

The checkout or transaction screen will disclose the item or service, total price, currency, taxes or estimated taxes, recurring terms if any, delivery method, network and gas fees, material restrictions, and refund treatment. Review wallet address, chain, token contract, quantity, and approval permissions before signing.

2. Authorization and Receipts

By confirming a purchase, you authorize the displayed charge or blockchain transaction. We provide an electronic confirmation or transaction record. Contact us promptly if a receipt is incorrect or a charge is unauthorized. Do not share payment credentials or wallet keys.

3. Digital Delivery

Digital content is delivered when it is credited to an account, made available for use or download, minted, claimed, transferred to the designated wallet, or otherwise supplied as disclosed. Consumables are delivered when credited and consumed when applied or spent.

4. General Refund Rule

Except where law requires otherwise or Section 5 applies, completed purchases of delivered digital content, consumed virtual items, claimed rewards, mints, and confirmed blockchain transactions are final. Changes in preference, market value, rarity, game balance, connectivity, hardware, or third-party fees do not by themselves create a refund right.

Nothing in this Policy limits remedies for content that is not delivered, materially misdescribed, faulty, duplicated by Company error, or subject to a non-waivable consumer guarantee.

5. When We Will Review a Refund

We will review timely requests involving:

- A duplicate direct charge caused by Company or its processor.

- A direct purchase not delivered after reasonable troubleshooting and any stated delivery period.
- Digital content materially different from the checkout description at the time of purchase.
- A verified unauthorized payment, subject to account-security and payment-provider investigation.
- A canceled paid event for which no equivalent entry, reschedule, or lawful substitute is provided.
- A refund or remedy required by applicable consumer law.

6. Blockchain Transactions

Company cannot reverse a confirmed public-chain transaction or recover an asset sent to an incorrect, unsupported, compromised, or inaccessible address. Gas, bridge, marketplace, and wallet fees paid to third parties are not refundable by Company. If Company caused a verifiable delivery error, the available remedy may be replacement, account credit, or refund of the amount Company actually received, depending on law and technical feasibility.

7. Mystery Items and Randomized Rewards

Before purchase, the Platform will disclose that an item is randomized and any legally required probabilities or material range. Receiving a lower-preference lawful outcome is not a defect. A randomized purchase may be restricted by location. Company will not market randomized paid content to minors because the Platform is 18+.

8. Subscriptions and Recurring Charges

Recurring terms, billing interval, price, trial, renewal, and cancellation method will be clearly disclosed before enrollment. Express consent is required. Cancel through account billing or the stated provider before the renewal cutoff to avoid the next charge. Cancellation stops future renewals and does not ordinarily refund the current period, subject to law.

Company will not make cancellation materially harder than sign-up and will provide renewal or price-change notices where required.

9. EEA and UK Withdrawal Rights

Eligible consumers may have a 14-day right to withdraw from a distance contract. For digital content or services supplied immediately, checkout may ask you to expressly request immediate performance and acknowledge that the withdrawal right is lost once performance begins or content is supplied, to the extent applicable law permits.

If that legally required consent or acknowledgment was not obtained, or if the content is faulty or misdescribed, mandatory cancellation, conformity, repair, replacement, price-reduction, or refund rights remain. Local mandatory law controls over this Policy.

10. How to Request a Refund

Email admin@psrgame.com within 14 days after the event giving rise to the request, unless law provides longer. Include account email, order or transaction ID, wallet address and transaction hash if relevant, purchase date, amount, item, reason, and supporting evidence. Never include full card numbers, passwords, seed phrases, or private keys.

11. Refund Method and Timing

Approved fiat refunds are normally returned to the original payment method. Approved Digital Asset remedies may use replacement, Platform credit, or another lawful method disclosed to you. Processing timing depends on payment rails and law. Taxes already remitted and third-party fees may be excluded where lawful and unrecoverable.

12. Chargebacks and Fraud

Contact us first when practical. A fraudulent chargeback, false unauthorized-payment claim, or effort to retain both delivered content and payment may result in account restriction, debt collection, evidence submission to providers, or legal action. A good-faith dispute or exercise of consumer rights will not be penalized.

13. Changes and Contact

This Policy applies prospectively from its effective date. Purchase support and refund requests: admin@psrgame.com.
Mail: NyFTee Original LLC, Attn: Billing, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States.

Copyright, Trademark and DMCA Policy

Rights-owner notices, counter-notices, repeat infringement, and brand protection

Effective: August 10, 2026

Last updated: August 10, 2026

Version: 1.0

Operator: NyFTee Original LLC

Address: 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States

NyFTee Original LLC respects intellectual-property rights and expects Platform users to do the same.

1. Scope

Pink Slip Arcade is one connected interactive platform. Its website, account system, economy, marketplace, applications, digital assets, events, and all current or future games are collectively the Platform. Street Heat, Passive Lanes, Street Story, and every other playable experience are Game Modes of that Platform, not separate services.

This Policy covers User Content, marketplace listings, profiles, uploads, links, and other material hosted or displayed through Company-controlled services. It does not control content hosted solely on a public blockchain or independent service that Company cannot remove.

2. Copyright Notice Requirements

A copyright owner or authorized agent who believes material infringes may send a notice containing all information required by 17 U.S.C. 512(c)(3):

- 1 A physical or electronic signature of the owner or authorized agent.
- 2 Identification of the copyrighted work, or a representative list if one notice covers multiple works.
- 3 Identification and location of the allegedly infringing material with enough detail for us to find it, including URLs, account, listing, token, or content identifiers.
- 4 The claimant's name, mailing address, telephone number, and email address.
- 5 A good-faith statement that the disputed use is not authorized by the owner, agent, or law.
- 6 A statement, under penalty of perjury, that the notice is accurate and the sender is authorized to act.

3. Designated Agent

Send DMCA notices to: DMCA Agent, NyFTee Original LLC; 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States; email: admin@psrgame.com. The subject line should read "DMCA Notice."

Publication of this contact does not complete the separate U.S. Copyright Office registration requirement. Company must register and keep its designated-agent entry current to seek applicable safe-harbor protections.

4. Response to a Notice

We may remove or disable access to identified material, notify the affected user, preserve records, and forward the notice as legally appropriate. We may request missing information. A facially invalid, abusive, or fraudulent notice may be rejected. Removal from Company systems may not erase an immutable blockchain record or third-party copy.

5. Counter-Notice

If you believe material was removed by mistake or misidentification, send a counter-notice containing all information required by 17 U.S.C. 512(g)(3). We may restore material after the statutory period unless the claimant gives notice of a filed court action. Restoration remains subject to the Platform Terms and other lawful grounds for removal.

- 1 Your physical or electronic signature.
- 2 Identification of the removed material and its former location.
- 3 A statement under penalty of perjury that you have a good-faith belief the material was removed or disabled because of mistake or misidentification.
- 4 Your name, address, and telephone number; consent to jurisdiction of the appropriate U.S. Federal District Court; and acceptance of service from the original claimant or agent.

6. Repeat Infringers

In appropriate circumstances, Company terminates accounts of repeat infringers and may restrict associated wallets or devices from Platform functions. We consider the number, timing, validity, severity, and resolution of notices and counter-notices rather than applying an automatic accusation-only rule.

7. Misrepresentations

Knowingly and materially misrepresenting infringement or mistaken removal may create liability under law. Do not submit a notice to silence criticism, resolve an ownership dispute unrelated to copyright, or target fair use without a good-faith evaluation.

8. Trademark, Impersonation, and Other Rights

Trademark owners may report confusing use, counterfeit assets, false affiliation, or impersonation to admin@psrgame.com. Include the registration or basis of rights, jurisdiction, challenged material, and explanation of confusion. Patent, publicity, privacy, and contract claims should be clearly identified and supported.

9. Company Marks and Fan Use

Pink Slip Arcade, associated logos, Game Mode names, trade dress, and related marks belong to Company or licensors. Limited descriptive references, commentary, reviews, and approved fan content must not imply sponsorship, use confusing branding, or sell unauthorized merchandise. NFT holder rights are governed by the NFT License.

10. Contact

Intellectual-property reports: admin@psrgame.com. Mail: DMCA Agent, NyFTee Original LLC, 11 E. Orange Grove Rd., Tucson, Arizona 85704, United States.
